Find the slope of the following lines just by examination:

1. $2x + 3y = 11$
2. $5x + 8y = -3$
3. $x - 7y = 9$

4. $17x - 41y = -23$
5. $-4x + 2y = 10$
6. $-6x - 3y = 9$

Find a \textit{beginning} of the equation of a line given the following slopes:

7. $m = \frac{2}{3}$
8. $m = -\frac{4}{7}$
9. $m = -\frac{1}{2}$
10. $m = 3$

Find the equation of the line through the given point having the given slope:

11. $m = \frac{2}{3}$, (-2, 4)
12. $m = -\frac{4}{7}$, (5, 6)

13. $m = -\frac{1}{2}$, (-1, -2)
14. $m = 3$, (3, -5)
